SUMMANRY

Software Developer (Frontend) with 3.5+ years of experience building scalable, high-performance, product-grade web applications using ReactJS, Next.js, TypeScript, and JavaScript (ES6+). Proven expertise in frontend architecture, reusable component design, performance optimization, and accessibility-first development. Strong experience translating complex UI/UX requirements into responsive, maintainable interfaces and integrating RESTful APIs in large-scale, data-driven systems. Collaborative team player with a product mindset, experienced in agile environments and cross-functional delivery. Seeking a Senior Frontend Engineer role to drive user-centric design, technical excellence, and measurable product impact.

SKILLS

Frontend / UI	ReactJS, TypeScript, NextJS, JavaScript (ES6+), AngularJS , HTML5, CSS3
UX Engineering	Component-Based Architecture, Responsive Design, Accessibility (semantic HTML), Cross-Browser Compatibility
State & Tooling	React Hooks, Redux, Redux Toolkit, Webpack, Vite, Swagger, Regex
DevOps / Cloud	AWS (S3, EC2, CI/CD), Docker, Nginx, Jenkins, GitHub Actions
Backend Integration	RESTful APIs, Node.js

EDUCATION

Bachelor of Computer Applications, CIMAGE College, Magadh University   2015 – 2018
Relevant Coursework: Data Structures, Web Technologies, Database Management, Software Engineering

EXPERIENCE

Software Developer   Sep 2022 – Oct 2025
Teknobuilt Solutions Pvt. Ltd. (Remote)   *Navi Mumbai, India*

- Designed and developed scalable, responsive UI components using React JS and modern CSS, significantly improving mobile usability.
- Built reusable component libraries and configuration-driven UI modules, enabling faster and more consistent feature delivery across teams.
- Optimized frontend rendering and state management, resulting in noticeably faster page load times.
- Translated complex UX designs into production-ready interfaces with a strong focus on accessibility, usability, and visual consistency.
- Integrated RESTful APIs and collaborated closely with backend teams to deliver real-time, data-driven enterprise dashboards.
- Deployed and maintained frontend applications using Docker, Nginx, and AWS-based CI/CD pipelines, improving overall system reliability and deployment efficiency.

PROFESSIONAL PROJECTS

PACE OS – Enterprise Construction Management System (Teknobuilt). Built large-scale, production-grade frontend modules using ReactJS, Redux, Material UI, and Django/DRF APIs. Developed configuration-driven systems such as Form Builder and Bulk Import Engine. Contributed to a reusable component library, UI performance optimization, and stable CI/CD deployment pipelines.

Control Tower – Real-Time Resource Monitoring Platform (Teknobuilt). Developed an interactive real-time monitoring dashboard using Highcharts (ReactJS) for manpower, machinery, and material insights. Designed Power BI–style visual analytics that helped operations teams track resource utilization, predict shortages, and make faster data-backed decisions. Enhanced chart performance, state management, and live API data handling for a seamless monitoring experience.

PERSONAL PROJECTS

IndiTalk AI — AI-powered chat application built with React, Vite, and Google GenAI featuring voice-to-text, text-to-speech, and modern glassmorphism UI. (Live)

Personal Portfolio — A modern, responsive portfolio built with React JS, CSS, Material UI, and EmailJS. Includes animations, smooth UI interactions, and a clean minimal design. (Live)

Crypto-Tracker — Interactive crypto dashboard with real-time data visualization using ReactJS, Material UI, and ChartJS. (Live)

Weather Forecast App — Responsive weather application using OpenWeatherMap APIs with clean UI and optimized client-side rendering. (Live)

CERTIFICATIONS & ACHIEVEMENTS

- Full Stack Development Certification – Newton School (Live)
- Business Intelligence using Power BI (Live)
- Introduction to Artificial Intelligence (Link)
- Generative AI Foundation Certificate (Link)
- Deloitte Australia – Data Analytics Job Simulation (Forage) (Link)
